

power supply

➔ BF2-BU

BUSing® power supply with external battery

Allows supply power to BUSing® installation.

- Backup power supply type
- Recommended for installations sensitive to voltage failures
- Auxiliary output for an external battery
- Allows to charge the external battery
- DIN rail mounted (4 modules) or in distribution box with depth 70mm

Description

Continuous electrical supply device for smart home installations.

This power supply incorporates a microprocessor that detects power failure and low battery. In case of power failure, it could keep the installation through the external battery.

It permits to send BUS telegrams so the screens make a warning notification to the user.

Technical Characteristics

Device Reference	Voltage Supply	Output Voltage	Power	Current Given
BF2-BU	85-265V AC	12V DC	12VA	0.5A ≈ 500mA
